

VMSG Calendar 2011

Specifications for Photographic Submission

We love all of your pets almost as much as you do! And we encourage you to submit as many photographs as you wish for your pet to be highlighted in our 2011 VMSG calendar.

Below are the specifications necessary to supply us with a high resolution image of your pet.

What size should they be?

The minimum size is:

2.25 inches wide

4.625 inches high —
1688 pixels high

How many megabytes is that for a jpeg image?

Since a jpeg image compresses your photograph it should be more than 3.7 megabytes in size.

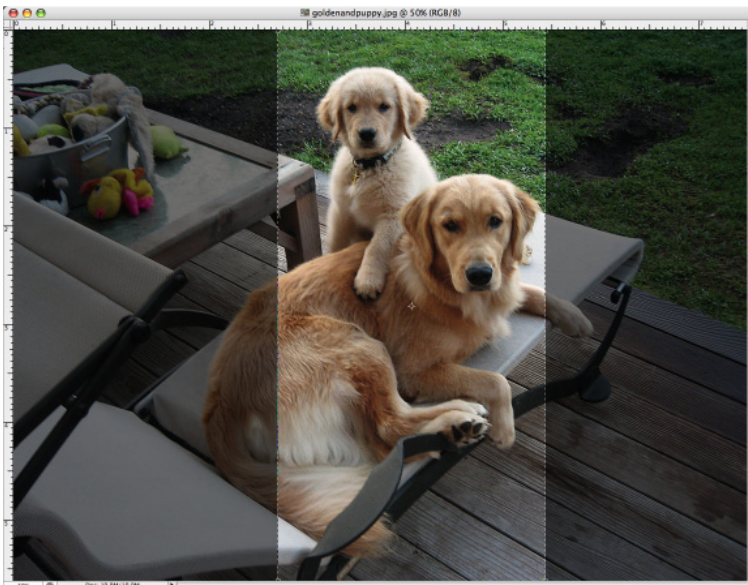

An image that size would be 11 MB raw.

Color or Black and White?

Our calendars are printed in full color.

How do I submit the photograph?

You can email the digital image or submit your image on a CD.

The image on the left provides you with an example of how our graphic artist might crop a horizontal image. Please supply the complete image so it can be cropped to best suit the calendar layout.
