

## STAT EMERGENCY CARE AUTHORIZATION

During the next hour the emergency doctor on duty will be working to stabilize your pet and provide you with information. The doctor may be relaying this information through the reception or technical staff as the doctor needs to be with your pet. A written estimate for charges will be provided as soon as the doctor is able to create a treatment and diagnostic plan (estimate) for your pet's visit.

We now need your authorization to perform the tasks to stabilize and treat your pet. The average cost for emergency stabilization is around \$500.00 (this may include IV catheter, fluids, emergency medications and depending on severity, possible CPR). Please initial which level of resuscitation you would like us to perform if necessary.

\_\_\_\_\_ Do Not Resuscitate.

\_\_\_\_\_ Standard cardiopulmonary resuscitation techniques (CPR).

\_\_\_\_\_ Extraordinary cardiopulmonary resuscitation techniques including open-chest cardiac massage, when indicated.

Signature: \_\_\_\_\_ Date: \_\_\_\_\_

By signing above, you grant permission to VMSG to render emergency care. You also understand that no guarantee can be given or will be implied as to the outcome of treatment.
